                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ò
                                                                                                                                                                            Sequence 2, Application US/10238709

Patent No. 668018

GENERAL INFORMATION:

APPLICANT: WEBSITER, Marion et al

TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES

TITLE OF INVENTION: THERED BY

TITLE OF INVENTION: THERED IV

CURRENT APPLICATION NUMBER: US/10/238,709

CURRENT APPLICATION NUMBER: US/10/238,709

CURRENT FILING DATE: 2002-09-11

NUMBER OF SEQ ID NOS: 4

SOFTWARE: FastSEQ for Windows Version 4.0

Sequence 4, Application US/09804471A

Patent No. 6479269

GENERAL INFORMATION:

APPLICANT: WEBSTER, Marion et al

TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC

TITLE OF INVENTION: THEREOF

TITLE OF INVENTION: THEREOF

FILE REFERENCE: CLOO1164

CURRENT APPLICATION NUMBER: US/09/804,471A

CURRENT APPLICATION NUMBER: 2001-03-13

NUMBER OF SEQ ID NOS: 4

Sequence 2, Application US/10282048
Patent No. 6692948
GENERAL INFORMATION:
PAPLICANT: WEI, Ming-Hui et al.
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES

```
Sequence 4, Application US/09916204

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 6, Application US/10282048

Patent No. 6652948

GENERAL INFORMATION:
APPLICANT: WET, Ming-Hui et al.
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES TITLE OF INVENTION: THEREOF FILE REPERENCE: CLOO1164CIP-DIV
CURRENT APPLICATION NUMBER: US/10/282,048
CURRENT PAILING DATE: 2002-10-29
NUMBER OF SEQ ID NOS: 6
SOFTWARE: FasteSEQ for Windows Version 4.0
SEQ ID NO 6
ILENGTH: 251
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       DIYAMKVMKKKALLAQEQVSFFEEERNILSRSTSPWIPQLQYAFQDKNHLYLVMEYQPGG 180

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps
Sequence 5, Application US/10282048

Patent No. 662948

GENERAL INFORMATION:
APPLICANT: WEL, MING-Hui et al.
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, ITILE OF INVENTION: THEREOF
FILE REFERENCE: CL001164CIP-DIV
CURRENT APPLICATION NUMBER: US/10/282,048
CURRENT FILING DATE: 2002-10-29
NUMBER OF SEQ ID NOS: 6
SOFTWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 5.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         0

Submitted (APR-2003) to the EMBL/GenBank/DDBJ databases.
--- SIMILARITY: Belongs to the Ser/Thr protein kinase family.
--- CAUTION: The sequence shown here is derived from an EMBL/GenBank/DDBJ whole genome shotgun (WGS) entry which

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

B49354
protein kinase (EC 2.7.1.37), myotonic dystrophy-associated - human
NyAlternate names: myotonin protein kinase
C;Species: Homo sapiens (man)
C;Species: Myourisely, Myourisely, Harley, H.G.; Crow, S.R.; Sohn, R.; Thirion,
Genomics 18, 673-679, 1993
A;Title: Genomic organization and transcriptional units at the myotonic dystrophy locus.
A;Recession: B49364
